

Product Overview

Product Name : Industrial Ultrasonic Cleaner

Model No.: BS130S

Brand : BSTSONIC

Brief Introduction

Adopts stainless steel tank & high-performance ultrasonic transducers, equipped with digital timer & constant temperature heating. Widely used for cleaning oil, dust, polishing wax and glue on hardware, auto parts, electronic components, optical lenses, molds etc.

Application : Hardware, Auto Parts, Electronics / Electronic Components, Jewelry, Laboratory
Electroplating Industry

Electrical Parameters

Item	Parameter
Input Voltage	AC380V 50Hz
Ultrasonic Frequency	40KHz
Ultrasonic Power	1800W
Heating Power	4000 W
Timer Range	0~60 minutes or continuous operation
Temperature Control Range	Room temperature ~ 120°C
Working Mode	Timing / Continuous operation

Cleaning Tank Specifications

Item	Parameter
Inner Tank Size	L×W×H: 800*400*400mm
Tank Volume	128 L
Tank Material	304 Stainless Steel
Tank Thickness	2.0 mm
Transducer Quantity	30 pcs
Drain Valve	Equipped
Lid & Cleaning Basket	Standard Accessories

Standard Functions

Digital display for time

Stable ultrasonic vibration, strong cleaning force

Functions: Sweep frequency / Power adjustable /Time and temperature adjustable

Dimension & Weight

Overall Outer Size : L×W×H: 1090*610*660mm

Net Weight : 79 KG

Gross Weight : 103KG

Standard Accessories

Stainless steel cleaning basket ×1

Tank cover ×1

Power cord ×1

User manual ×1

Safety Precautions

Do not run the machine without liquid inside the tank. ◦

Keep the machine away from flammable, corrosive liquid.

Please cut off the power supply before maintenance.
