

Circuit

Electrical Characteristics		Mechanical Characteristics	
Resistance Values	5 KOhm ~ 2 MOhm +/- 20%	Total Rotational Angle	300 deg +/- 5 deg
Resistance Taper	A, B, C, D	Rotational Torque	20 ~ 200 gf/cm
Residual Resistance	0.1% max of total resistance	Rotational Stop Strength	7 kgf/cm
Rated Power	taper A, C, D = 0.06W taper B = 0.125W	Push / Pull Strength	7 kgf/cm
Operating Voltage	taper A, C, D = 150V taper B = 200V	Click Position	Center, 11, 21, 31, 41
Insulation Resistance	100MOhm min @500V DC	Llife	15,000 cycles
Gang Error	3dB max
